

Giga Class Market

Compl

This guide describes the full Giga Class Market education marketplace and LMS: what visitors see, how students learn, how teachers run classes, and how administrators operate courses, payments, and certificates.

Safe to share externally

This document contains no passwords, API keys, payment account numbers, Zoom secrets, database credentials, or private student data. It is written for partners, clients, and reviewers outside the company.

Table of Contents

- 1. Platform overview

- 8. Course content modules
- 9. Payments, coupons, messaging and live classes
- 10. Portfolios
- 11. Public URL map
- 12. What is intentionally excluded

1. Platform overview

Giga Class Market is a WordPress-based course marketplace with a built-in Learning Management System (LMS). Visitors discover and buy courses. After manual payment verification, students receive dashboard access to curriculum, live classes, assignments, quizzes, recordings, and certificates. Teachers manage live sessions and course materials. Administrators publish courses, approve payments, manage users, and configure site settings.

- Course marketplace (browse, detail pages, featured courses)
- Manual payment verification with screenshot and transaction ID
- Student learning dashboard and course room
- Teacher tools for live class, materials, and grading
- Certificates with public verification
- WhatsApp-oriented communication helpers
- Optional personal portfolio profiles (share-by-URL)

2. Roles at a glance

Visitor

- Browse home, courses, about, contact
- Submit payment verification for a course
- Verify certificates by code
- View shared portfolio links
- No course content until enrolled

Student

- Secure branded login
- My Courses, progress, live join, announcements
- Assignments, quizzes, recordings, notes, course chat
- Profile and password update

Teacher

- Assigned course dashboard
- Schedule, start, and end live class
- Attendance, materials, announcements, recordings
- Assignments plus grading, quizzes, course chat

Administrator

- Full Giga Class Market admin menu
- Courses, payments, students, teachers, coupons
- Live class overview, analytics, contacts, content tools
- Settings for company, payments display, WhatsApp, SEO, about/team, live integration area

3. Public website features

Marketing and discovery

- Home page with hero slides, featured courses, benefits, testimonials, CTAs
- Courses archive with categories and search
- Course detail: pricing/sale labels, instructor, duration, curriculum outline, FAQ, bundles, reviews, community link, Buy Now
- About page with mission/vision and editable CEO plus core team content
- Contact form
- Legal pages: privacy, terms, refund
- Optional promotional popup banner (hidden on portfolio pages)

Commerce entry

- Payment instructions page for selected course
- Payment verification form: personal details, method, transaction ID, screenshot, optional coupon
- Submission enters under-review status until admin decision

Trust and certificates

- Public certificate verification page by certificate code
- Print-friendly certificate view when valid

4. Student dashboard and learning

After enrollment is approved, the student signs in on the branded login page and lands on the Student Dashboard.

Dashboard capabilities

- My Courses list with progress percentage
- Join live class when a session is active
- View announcements from teachers
- Access recordings shared by teachers
- Submit assignments (file and/or notes) and see grades/feedback
- Take quizzes and view attempt/score results
- See payments still under review
- Update profile and password

Course learning room

- Dedicated course room for an enrolled course
- Live class banner and upcoming schedule
- Study notes and materials uploaded by teacher
- Course chat thread
- Curriculum lessons with mark-complete progress tracking

Access rules

- Only enrolled, active students can open protected learning pages
- Frozen enrollments block learning access until unfrozen by admin

5. Teacher dashboard and live teaching

Teachers sign in with teacher accounts and open the Teacher Dashboard for their assigned course(s).

Teaching tools

- Schedule live class (start and end time)
- Start class (creates meeting when live integration is configured; otherwise fallback meeting room)
- End class when finished
- Attendance roster for live sessions
- Upload and remove study materials
- Post announcements to enrolled students
- Add recording links for later student playback
- Create assignments and grade submissions
- Create quizzes with pass score
- Use course chat with students
- View enrolled student list for the course

6. Admin (Giga Class Market) console

Administrators use the WordPress admin area under the Giga Class Market menu.

Dashboard: Operational overview and quick actions

Courses: Create, edit, and publish courses (thumbnail required to publish)

Payments: Review proofs, approve or reject, credential delivery actions

Coupons: Create and manage discount codes

Students: List students, freeze/unfreeze, certificates, credential tools

Teachers: Create teachers, set access, assign courses

Live Classes: Operational overview of class sessions

Analytics: Enrollment and revenue-oriented metrics

Contact Messages: Inbox and status handling

Testimonials: Home and social proof content

Portfolios / Portfolio Projects: Personal profile pages and project cards

Hero Slides: Home hero content

Settings: Company, payment method display, WhatsApp, website, about/team, SEO, course defaults, live integration settings area

Activity Log: Audit trail of important actions

7. End-to-end workflows

7.1 Browse course and enroll

Step 1. Discover

Visitor opens Home or Courses and selects a course.

Step 2. Buy Now

Opens payment instructions for that course.

Step 3. Pay externally

Visitor pays using one of the displayed methods.

Step 4. Submit proof

Fills verification form with details, transaction ID, screenshot, optional coupon.

Step 5. Admin review

Admin checks payment and approves or rejects.

Step 6. Access granted

On approval, student account is created or linked, enrollment is activated, and login details are communicated through configured channels.

Flow

Visitor -> Course page -> Buy Now -> Payment info
-> Payment verification form -> Under review
Admin -> Payments -> Approve
Student -> Login -> Student Dashboard -> Open course

7.2 Student learning loop

Step 1. Login

Student signs in on the branded login page.

Step 2. Open dashboard

Reviews enrolled courses and progress.

Step 3. Enter course room

Joins live class when active; reads notes; uses chat.

Step 4. Complete lessons

Works through curriculum and marks lessons complete.

Step 5. Assessments

Submits assignments and attempts quizzes.

Step 6. Catch up

Watches recordings and reads announcements.

Flow

Login -> Student Dashboard -> Course Room
|- Join Live Class
|- Curriculum progress
|- Assignments / Quizzes
|- Recordings / Announcements / Notes

7.3 Teacher live-class workflow

Step 1. Open teacher dashboard

Select assigned course.

Step 2. Schedule

Set class start and end.

Step 3. Start class

Meeting becomes available for enrolled students.

Step 4. Teach

Students join; attendance is recorded.

Step 5. Support materials

Upload notes, post announcements, share recording links.

Step 6. Assess

Create assignments/quizzes and grade submissions.

Step 7. End class

Close the live session.

Flow

Teacher login -> Teacher Dashboard -> Schedule
Start Class -> Students Join -> Attendance
Materials / Announcements / Recordings
Assignments / Quizzes / Grades -> End Class

7.4 Admin publishes a course

Step 1. Add course

Create course with title, description, excerpt.

Step 2. Required thumbnail

Set course thumbnail (required for publish).

Step 3. Pricing and meta

Price/sale, duration, instructor, outcomes, requirements, FAQ, featured flags.

Step 4. Curriculum

Add modules and lessons (content, video, duration, preview options).

Step 5. Category and publish

Assign category and publish to the public catalog.

Flow

Admin -> Courses -> Add New

Thumbnail + Pricing + Curriculum + Category

Publish -> Visible on /courses/ and home (if featured)

7.5 Payment approval workflow

Step 1. Open Payments

Filter submissions under review.

Step 2. Validate proof

Compare transaction details and uploaded screenshot.

Step 3. Approve

Creates/links student, activates enrollment, triggers notifications.

Step 4. Or reject

Reject with reason; student remains without course access.

Step 5. Follow-up tools

Credential send and reminder actions available from admin tools.

7.6 Certificate workflow

Step 1. Issue

Admin generates certificate for a student course (or bulk for completed learners).

Step 2. Deliver

Student receives certificate identity through configured notification channels.

Step 3. Verify publicly

Anyone can open Verify Certificate and enter the code.

Step 4. Result

Valid certificates show a printable verification view.

7.7 Teacher account setup

Step 1. Create teacher

Admin creates teacher account from Teachers panel.

Step 2. Assign course

Link teacher to one or more courses.

Step 3. Teacher login

Teacher uses branded login and opens teacher dashboard.

8. Course content modules

- Curriculum: modules and lessons with content/video and completion tracking
- Live classes: schedule, join links, attendance
- Study notes: teacher-uploaded files for enrolled students
- Course chat: shared discussion thread
- Announcements: teacher-to-student updates
- Recordings: external playback links
- Assignments: create, submit, grade, feedback
- Quizzes: questions, pass score, attempts/best score
- Certificates: unique code plus public verify page
- Reviews: student feedback with moderation path
- Bundles: related course recommendations on detail pages

9. Payments, coupons, messaging and live classes

High-level only

Exact account numbers, API secrets, and provider credentials are configured inside Settings by authorized staff and are not listed in this guide.

Payments

- Manual payment model (visitor pays externally, then submits proof)
- Configurable displayed payment methods
- Admin verification gate before enrollment access

Coupons

- Percent or fixed discounts
- Optional course targeting, usage limits, and date windows
- Validated on the payment verification form

WhatsApp-oriented messaging

- Site/course community buttons can deep-link to WhatsApp
- Admin can use reminder and credential communication helpers
- Actual numbers are managed in Settings, not in this document

Live classes

- Teacher starts a class from the teacher dashboard
- When live meeting integration is configured, a meeting is created automatically
- If not configured, a fallback meeting room flow is used
- Students join from dashboard/course room; attendance can be recorded
- Optional class reminder emails can be scheduled by the system

10. Portfolios

Administrators can publish personal portfolio pages for creators or team members. These pages are share-only and are not linked in the main site navigation.

- Create profile under Portfolios (name, slug, photo, bio, skills, CTA)
- Public URL pattern: <https://gigaclassmarket.com/{slug}/>
- Create projects under Portfolio Projects and set Portfolio owner
- Categories: Cyber Security, Networking, Web Development, Animation
- Promotional popup is suppressed on portfolio pages

Portfolio workflow

Admin -> Portfolios -> Add profile (set slug) -> Publish

Admin -> Portfolio Projects -> Assign Portfolio owner -> Publish

Share only: <https://gigaclassmarket.com/{slug}/>

11. Public URL map

- / Home
- /courses/ Course catalog
- /courses/{course-slug}/ Course detail
- /about/ About
- /contact/ Contact
- /login/ Student/Teacher login
- /student-dashboard/ Student home
- /teacher-dashboard/ Teacher home
- /course-learn/?course_id=... Student course room
- /payment/?course_id=... Payment instructions
- /payment-verification/?course_id=... Submit payment proof
- /live-class/?class_id=... Live join helper
- /verify-certificate/ Public certificate check
- /privacy-policy/ , /terms/ , /refund-policy/ Legal
- /{portfolio-slug}/ Personal portfolio profile

12. What is intentionally excluded

This shareable guide does not include:

- Administrator, teacher, or student passwords
- Default password values from settings
- Zoom/API client secrets, tokens, or host credentials
- Bank or wallet account numbers
- Private student personal information or transaction IDs
- SMTP keys, database credentials, hosting panel logins
- Search Console verification secrets or internal deployment runbooks

For implementation support that requires protected credentials, use your authorized internal company contact and secure channels.

Summary

Giga Class Market connects marketplace discovery, manual payment verification, student learning, teacher live instruction, certificates, and admin operations in one platform. Use this guide to understand capabilities and workflows without exposing sensitive access details.
